

NCRST-E Program Deliverables Project Year Two

Current per the submitted year two proposal and modified workplan.

1. Consortium Oversight Committee – An oversight committee has been developed for the NCRST-E, the members of which are recognized experts from academia, industry, and state and local transportation agencies. The committee will meet twice during the year to discuss consortium activities and provided significant input and guidance to the research activities of the consortium.

2. Consortium Outreach Information and Web Page – Outreach information have been developed and will be distributed in hard copy and from the NCRST-E web site. Additional informational outreach materials are planned and can be found at:

Planned Consortium Informational Materials:

<http://www.ncrste.msstate.edu/publications/publications.html>

3. Consortium National Forum – The NCRST-E will participate in the TRB's National Forum for Remote Sensing in Transportation.

4. Quarterly Status and Progress Reports by the Consortium Lead Institution – Will be coordinated, developed, and provided.

5. Annual Report on Program Progress and Accomplishments – An annual report will be prepared to provides information about the NCRST-E consortium's progress and accomplishments.

6. Technical Synthesis Report – Input to a Annual Synthesis Report will be provided and the NCRST-E will assist in review and preparation responsibilities as needed.

7. Cookbooks – A series of product implementation guidelines for specific application areas are planned and will be developed.
